SUBJECT INDEX

Adenovirus serotypes, canine, difference in cytopathology between, 328
Anaemia and parasitaemia, factors affecting blood sampling for, in bovine trypanosomiasis, 130
Antibody response, stimulation of the, to sheep red blood cells in piglets and young pigs by levamisole, 17
Aujeszky's disease in Great Britain, a brief description of, and its relative importance, 215

Babesia major piroplasms, titration of, in intact calves, 44
Bed pads, problems with calf, 380
Blood composition in cows in commercial dairy herds and its relationships with season and lactation, 64
Blood, horse, the pH/log PCO_2 buffer curve of, 324
Blood sampling, factors affecting, for anaemia and parasitaemia in bovine trypanosomiasis, 130
Blood serum amylase and transferrin, polymorphism of, and leptospirosis in large white Polish pigs, 103
Body weight, milk yield and mild composition, effects of ketosis in dairy cows on, 40
Book reviews:
  An introduction to animal husbandry (J. O. L. King), 212
  Atlas of small animal surgery (T. David), 211
  Avian coccidiosis (P. L. Long, K. N. Boorman & B. M. Freeman), 301
  Control of reproduction in the cow (J. M. Streenan), 392
  Dairy cattle: principles, practices, problems, profits (D. L. Bath, F. N. Dickinson, H. A. Tucker & R. D. Appleman), 303
  Disease of poultry (M. S. Hofstad, B. W. Calne, C. F. Helmboldt, W. M. Reid & H. W. Yoder), 300
  Fish pathology (R. J. Roberts). 492
  Functional mammalian neuroanatomy (T. W. Jenkins), 299
  General veterinary pathology (R. G. Thomson), 394
  Livestock health and housing (D. and P. Sainsbury), 493
  Manual of standardized methods for veterinary microbiology (G. E. Cottral), 299
  Patterns of growth and development in cattle (H. de Boer & J. Martin), 390
  Pharmacological basis of small animal medicine (A. T. Yoxall & J. F. R. Hind), 493
  Physiology of reproduction and artificial insemination of cattle (G. W. Salisbury, N. L. van Demark & J. R. Lodge), 391
  Respiratory diseases in cattle (W. B. Martin), 392
  Review of veterinary helminthology (A. M. Dunn), 610
  The biology of the pig (W. G. Pond & K. A. Houpt), 213
  Viruses of vertebrates (Sir C. Andrewes, H. G. Pereira & P. Wildy), 210
  Zoo and wild animal medicine (M. E. Fowler), 303
Bromosulphalein fractional clearance and plasma volume, changes in, in induced hypocalcaemia in cows, 25
BVJ – 1879, 387, 477
BVJ – 1929, 606

Calves:
  haematocrit, biochemical and plasma cortisol changes associated with diarrhoea in the, 600
  problems with calf bed pads, 380
  titration of *Babesia major* piroplasms in intact, 44
Campylobacter fetus subspecies *intestinalis*, genital tropism and coital transmission of, 83
Cattle:
  blood composition of cows in commercial dairy herds and its relationships with season and lactation, 64
  bovine generalized glycogenosis type II: a clinico-pathological study, 338
  changes in bromosulphalein fractional clearance and plasma volume in induced hypocalcaemia in cows, 25
  colonization of the bovine teat duct following inoculation with *Staphylococcus aureus* and *Escherichia coli*, 149
  combined use of milk progesterone profiles, clinical examination and oestrus observation for the study of fertility in the post-partum period of cows, 568
  diurnal variation in rectal temperature of N'Dama, in the Gambia, 113
  effect of reducing plasma calcium levels on some plasma enzyme levels in sheep and cows, 30
  effects of ketosis in dairy cows on body weight, milk yield and milk composition, 40
  experimental oral infections of pregnant heifers with *Salmonella dublin*, 75
  extrapolation from experimental chronic staphylococcal mastitis in mice to experimental infections in, 527
  factors affecting blood sampling for anaemia and parasitaemia in bovine trypanosomiasis, 130
  factors affecting the frequency of isolating *Streptococcus agalactiae* from herd milk supplies and the control of the organism in the dairy herd, 119
  fertility of cows inseminated on the basis of milk progesterone measurements, 537
  induced hypocalcaemia in sheep and cows I. Changes in plasma inorganic phosphorus levels, 440
  infectious bovine keratoconjunctivitis, a review, 225
  influence of breed and age on the prevalence of bovine fascioliasis in Kenya, 198
  instruments for non-surgical collection and transfer of embryos, 185
  isolation of *Streptococcus uberis* from cows in two dairy herds, 262
  location of the microflora in the skin of, 519
  milk progesterone determination as applied to the confirmation of oestrus, the detection of cycling and as an aid to veterinarian and biotechnical measures in cows, 541
  oestrone sulphate in milk as an indicator of a viable conceptus in cows, 355
  reproductive safety studies of oxfendazole in sheep and, 405
  studies of the virulence of *Salmonella dublin* in experimental infections of rats and, 243
  topography of the skin surface and, 376
  use of milk progesterone analysis in the study of oestrus detection, herd fertility and embryonic mortality in dairy cows, 559
  use of progesterone concentrations in milk and plasma for pregnancy diagnosis in cows, 204
Cestodes and trematodes of ruminants, efficacy of fenbendazole against the most important, 318
Chlamydia, improved recovery of vitamin E-treated lambs that have been experimentally infected with: intratracheal, 291
Cloprostenol-induced oestrus and spontaneous oestrus, a study of, by means of the milk progesterone assay, 578
Cloxacillin therapy, response to treatment of chronic mastitis induced in mice by strains of *Staphylococcus aureus* isolated from herds of different susceptibility to, 92
Coccidiosis, efficacy of robenidine in the prevention of rabbit, 349
Conceptus, viable, in cows, oestrone sulphate in milk as an indicator of a, 355
Corynebacterium ovis infection in sheep, a comparison of five serological tests for the diagnosis of experimental, 171
Corynebacterium renale, specific immunofluoresence of, 50
Cortisol, plasma, haematocrit and biochemical changes associated with diarrhoea in the calf, 600
Cytopathology, differences in, between canine adenovirus serotypes, 328

Deer, an account of opinion about the length of life of the: *cervinus annos vivere*, 591
Diarrhoea:
  epidemic, and transmissible gastroenteritis in pigs, 305
  in the calf, haematocrit, biochemical and plasma cortisol changes associated with, 600
Diurnal variation in rectal temperature of N'Dama cattle in the Gambia, 113
Dog, differences in cytopathology between canine adenovirus serotypes, 328
Dogs:
  as definitive hosts; *Taenia hydatigena* and *Taenia multicips* infections in Snowdonia, U.K. I, 426
  hunting, and foxes, the role of, as definitive hosts, and of sheep as intermediate hosts. *Taenia hydatigena* and *Taenia multiceps* infections in Snowdonia, U.K. II, 433
Dolphins, thyroid function in; radioimmunoassay measurement of thyroid hormones, 96
Dysentery, swine, 395

Editorial, 1
Egg production and behaviour, effect of feed withdrawal on, in White Leghorns on litter and wire, 364
Eggs:
  fertilized pig, effect of porcine parvovirus on development of, 249
  fertilized pig, effect of transferring parvovirus-infected, into seronegative gilts, 255
Embryonic mortality, herd fertility and oestrus detection in dairy cows, the use of milk progesterone analysis in the study of, 559
Embryos, instruments for non-surgical collection and transfer of bovine, 185
Energy and protein under-nutrition in the weanling filly foal, 331
Escherichia coli and *Staphylococcus aureus*, colonization of the bovine teat duct following inoculation with, 149

Fascioliasis, bovine, the influence of breed and age on the prevalence of, in Kenya, 198

Feed withdrawal, effect of, on behaviour and egg production in White Leghorns on litter and wire, 564
Fenbendazole:
  administered via a feed-block carrier, studies in sheep on the efficacy of, 271
  efficacy of, against the most important trematodes and cestodes of ruminants, 318
Fertility:
  of dairy cows inseminated on the basis of milk progesterone measurements, 537
  herd, oestrus detection and embryonic mortality in dairy cows, the use of milk progesterone analysis in the study of, 559
  in the post-partum period of dairy cows, combined use of milk progesterone profiles, clinical examination and oestrus observation for the study of, 568
Fluorine, magnesium and phophorus from magnesium and calcium phosphates, retention by sheep of, 411
Foxes and hunting dogs, the role of, as definitive hosts, and of sheep as intermediate hosts. *Taenia hydatigena* and *Taenia multiceps* infections in Snowdonia, U.K. II, 433

Gambia, diurnal variation in rectal temperature of N'Dama cattle in the, 115
Gastroenteritis, transmissible, and epidemic diarrhoea of pigs, 305
Genital tropism and coital transmission of *Campylobacter fetus* subspecies *intestinalis*, 83
George Fleming Prize, 304
Glycogenosis type II, bovine generalized: a clinico-pathological study, 338

Haematocrit, biochemical and plasma cortisol changes associated with diarrhoea in the calf, 600
Haemolytic anaemia in eight-week-old Brown Leghorn cockerels, haematological and biochemical findings in an experimentally produced, 279
Hormone assay techniques for improving reproductive efficiency, the need for and possible methods of application of, 453
Horse:
  energy and protein under-nutrition in the weanling filly foal, 331
  the pH/log PCO_2 buffer curve of blood, 324
Hypocalcaemia:
  induced, in cows, changes in bromosulphalein fractional clearance and plasma volume in, 25
  induced, in cows and sheep, I. Changes in plasma inorganic phosphorus levels, 440

Immunoglobulin, serum, levels in sheep during the course of naturally acquired and experimentally induced trypanosomiasis, 178
Infectious bovine keratoconjunctivitis, a review, 225
Ischaemic pectoral myopathy, pathogenesis of, in the domestic turkey, 286

Kenya, the influence of breed and age on the prevalence of bovine fascioliasis in, 198
Keratoconjunctivitis, infectious bovine, a review, 225
Ketosis in dairy cows, effects of, on body weight, milk yield and milk composition, 40

Lactation and season, blood composition of cows in commercial dairy herds and its relationships with, 64
Lambs, improved recovery of vitamin E-treated, that have been experimentally infected with intratracheal chlamydia, 291
Leptospirosis and polymorphism of blood serum amylase and transferrin in large white Polish pigs, 103
Levamisole, stimulation of the antibody response to sheep red blood cells in piglets and young pigs by, 17
Life of the deer, an account of opinion about the length of: *cervinus annos vivere*, 591
Listeria monocytogenes, isolation of, from animals in the Sudan, 297

Magnesium, phosphorus and fluorine from magnesium and calcium phosphates, retention by sheep of, 411
Mastitis:
  chronic, induced in mice by strains of *Staphylococcus aureus* isolated from herds of different susceptibility to cloxacillin therapy, response to treatment of, 92
  extrapolation from experimental chronic staphylococcal, in mice to experimental infections in cattle, 527
  the epidemiology and pathogenesis of experimental staphylococcal and coliform, in the mouse, 163
Metabolism cages, robust and inexpensive, for sheep, 294
Mice, extrapolation from experimental chronic staphylococcal mastitis in, to experimental infections in cattle, 527
Microflora in the skin of cattle, location of the, 519

Milk:
  combined use of milk progesterone profiles, clinical examination and oestrus observation for the study of fertility in the post-partum period of dairy cows, 568
  fertility of dairy cows inseminated on the basis of milk progesterone measurements, 537
  improved method for progesterone determination in milk-fat, 464
  the measurement of progesterone in, 460
  methods of improving the accuracy of positive results from milk progesterone pregnancy tests, 489
  plasma and, the use of progesterone concentrations in, for pregnancy diagnosis in cattle, 204
  progesterone as a diagnostic aid, 550
  progesterone assay: a comparison of inter-quarter and sampling time variation, 512
  progesterone determination as applied to the confirmation of oestrus, the detection of cycling and as an aid to veterinarian and biotechnical measures in cows, 541
  oestrone sulphate in, as an indicator of a viable conceptus in cows, 355
  oestrone sulphate in, and its association with pregnancy, 462
  radioimmunoassay of progesterone in: development of techniques for large-scale use as a test of pregnancy, 470
  study of cloprostenol-induced oestrus and spontaneous oestrus by means of the milk progesterone assay, 578
  supplies, factors affecting the frequency of isolating *Streptococcus agalactiae* from herd, and the control of the organism in the dairy herd, 119
  use of milk progesterone analysis in the study of oestrus detection, herd fertility and embryonic mortality in dairy cows, 559
  use of the milk progesterone test for pregnancy determination, 478
  yield, composition and body weight, effects of ketosis in dairy cows on, 40
Miscellany, 315, 401, 509
Mouse, the epidemiology and pathogenesis of experimental staphylococcal and coliform mastitis in the, 163
Muscle, quantitative image analysis of skeletal, from newborn pigs with myofibrillar hypoplasia and splayleg, 370
Myofibrillar hypoplasia and splayleg, quantitative image analysis of skeletal muscle from newborn pigs with, 370

Oestrone sulphate in milk as an indicator of a viable conceptus in cows, 355
Oestrone sulphate in milk and its association with pregnancy, 462
Oestrus:
  detection, herd fertility and embryonic mortality in dairy cows, the use of milk progesterone analysis in the study of, 559
  milk progesterone determination as applied to the confirmation of, the detection of cycling and as an aid to veterinarian and biotechnical measures in cows, 541
  observation, milk progesterone profiles and clinical examination, combined use of, for the study of fertility in the post-partum period of dairy cows, 568
  a study of cloprostenol-induced and spontaneous, by means of the milk progesterone assay, 578
Oxfendazole, reproductive safety studies of, in sheep and cattle, 405

Parainfluenza virus, the occurrence of antibodies to, in sera of some domestic animals in the Sudan, 192
Parasitaemia and anaemia, factors affecting blood sampling for, in bovine trypanosomiasis, 130
Parvovirus-infected fertilized pig eggs, effect of transferring, into seronegative gilts, 255
Parvovirus, porcine, effect of, on development of fertilized pig eggs, 249
pH/log PCO_2 buffer curve of horse blood, 324
Phosphorus levels, changes in plasma inorganic; induced hypocalcaemia in cows and sheep I, 440
Phosphorus, magnesium and fluorine from magnesium and calcium phosphates, retention by sheep of, 411
Pigs:
  effect of inseminating seropositive gilts with semen containing porcine parvovirus, 420
  effect of porcine parvovirus on development of fertilized pig eggs, 249
  effect of transferring parvovirus-infected fertilized eggs into seronegative gilts, 255
  polymorphism of blood serum amylase and transferrin and leptospirosis in large white Polish, 103
  quantitative image analysis of skeletal muscle from newborn, with myofibrillar hypoplasia and splayleg, 370
  respiratory diseases of, 497

salmonellosis in, 109
stimulation of the antibody response to sheep red blood cells in piglets and young pigs by levamisole, 17
swine dysentery, 395
transmissible gastroenteritis and epidemic diarrhoea of, 305
Plasma:
calcium levels, effect of reducing, on some plasma enzyme levels in cows and sheep, 30
cortisol, haematocrit and biochemical changes associated with diarrhoea in the calf, 600
inorganic phosphorus levels, changes in; induced hypocalcaemia in cows and sheep I, 440
milk and, the use of progesterone concentrations in, for pregnancy diagnosis in cattle, 204
volume and bromosulphalein fractional clearance, changes in, in induced hypocalcaemia in cows, 25
Porcine parvovirus, effect of inseminating seropositive gilts with semen containing, 420
Poultry:
effect of feed withdrawal on behaviour and egg production in White Leghorns on litter and wire, 364
haematological and biochemical findings in an experimentally produced haemolytic anaemia in eight-week-old Brown Leghorn cockerels, 279
Pregnancy:
development of techniques for large-scale use as a test of: radioimmunoassay of progesterone in milk, 470
diagnosis in cattle, the use of progesterone concentrations in milk and plasma for, 204
methods of improving the accuracy of positive results from milk progesterone tests, 489
oestrone sulphate in milk and its association with, 462
use of the milk progesterone test for determination, 478
Pregnant heifers, experimental oral infections of, with *Salmonella dublin*, 75
Progesterone:
combined use of milk progesterone profiles, clinical examination and oestrus observation for the study of fertility in the post-partum period of dairy cows, 568
concentrations in milk and plasma, the use of, for pregnancy diagnosis in cattle, 204
fertility of dairy cows inseminated on the basis of milk progesterone measurements, 537
improved method for determination in milk-fat, 464
measurement of, in milk, 460
methods of improving the accuracy of positive results from milk progesterone pregnancy tests, 489
milk progesterone as a diagnostic aid, 550
milk progesterone assay: a comparison of inter-quarter and sampling time variation, 512
milk progesterone determination as applied to the confirmation of oestrus, the detection of cycling and as an aid to veterinarian and biotechnical measures in cows, 541
radioimmunoassay of, in milk: development of techniques for large-scale use as a test of pregnancy, 470
study of cloprostenol-induced oestrus and spontaneous oestrus by means of the milk progesterone assay, 578
use of milk progesterone analysis in the study of oestrus detection, herd fertility and embryonic mortality in dairy cows, 559
use of the milk progesterone test for pregnancy determination, 478
Protein and energy under-nutrition in the weanling filly foal, 331

RABBIT, efficacy of robenidine in the prevention of coccidiosis, 349
Rabies virus infection, a review of non-bite transmission of, 142
Radioimmunoassay:
of progesterone in milk: development of techniques for large-scale use as a test of pregnancy, 470
measurement of thyroid hormones: thyroid function in dolphins, 96
Rapeseed meals, a review of the 'toxic' effects of, with observations on meal from improved varieties, 3
Rats, studies of the virulence of *Salmonella dublin* in experimental infections of cattle and, 243
Reproductive efficiency, hormone assay techniques for improving, the need for and possible methods of application of, 453
Respiratory diseases of pigs, 497
Robenidine, efficacy of, in the prevention of rabbit coccidiosis, 349
Ruminants, efficacy of fenbendazole against the most important trematodes and cestodes of, 318

SALMONELLA dublin:
experimental oral infections of pregnant heifers with, 75
studies of the virulence of, in experimental infections of cattle and rats, 243
Salmonellosis in pigs, 109
Salt poisoning in turkey poults, 55
Season and lactation, blood composition of cows in commercial dairy herds and its relationships with, 64
Semen containing porcine parvovirus, effect of inseminating seropositive gilts with, 420
Sheep: 381, 491
comparison of five serological tests for the diagnosis of experimental *Corynebacterium ovis* infection in, 172
effect of reducing plasma calcium levels on some plasma enzyme levels in cows and, 30
induced hypocalcaemia in cows and, I. Changes in plasma inorganic phorphorus levels, 440
intermediate hosts and the role of hunting dogs and foxes as definitive hosts. *Taenia hydatigena* and *Taenia multiceps* infections in Snowdonia U.K. II, 433
reproductive safety studies of oxfendazole in cattle and, 405
retention by, of magnesium, phosphorus and fluorine from magnesium and calcium phosphates, 411
robust and inexpensive metabolism cages for, 294
serum immunoglobulin levels in, during the course of naturally acquired and experimentally induced trypanosomiasis, 178
studies in, on the efficacy of fenbendazole administered via a feed-block carrier, 271
topography of the skin surface of cattle and, 376
Skin:
of cattle, location of the microflora in the, 519
surface, the topography of the, of cattle and sheep, 376
Splayleg and myofibrillar hypoplasia, quantitative image analysis of skeletal muscle from newborn pigs with, 370
Staphylococcus aureus:
and *Escherichia coli*, colonization of the bovine teat duct following inoculation with, 149
strains of, isolated from herds of different susceptibility to cloxacillin therapy, response to treatment of chronic mastitis induced in mice by, 92
Staphylococcal mastitis, extrapolation from experimental chronic, in mice to experimental infections in cattle, 527
Stomoxys calcitrans, the stable fly, an attempt to infect, with *Tyrpanosoma theileri*, 416
Streptococcus agalactiae, factors affecting the frequency of isolating, from herd milk supplies and the control of the organism in the dairy herd, 119
Streptococcus uberis, the isolation of, from cows in two dairy herds, 262
Sudan:
isolation of *Listeria monocytogenes*, from animals in the, 297
the occurrence of antibodies to parainfluenza$_3$ virus in sera of some domestic animals in the, 192

TAENIA hydatigena and *Taenia multiceps* infections in Snowdonia, U.K.:
I. farm dogs as definitive hosts, 426
II. the role of hunting dogs and foxes as definitive hosts, and of sheep as intermediate hosts, 433
Temperature, rectal, diurnal variation in, of N'Dama cattle in the Gambia, 113
Thyroid function in dolphins: radioimmunoassay measurement of thyroid hormones, 96
Trematodes and cestodes of ruminants, efficacy of fenbendazole against the most important, 318
Trypanosoma theileri, an attempt to infect the stable fly *Stomoxys calcitrans* with, 416
Trypanosomiasis:
factors affecting blood sampling for anaemia and parasitaemia in bovine, 130
serum immunoglobulin levels in sheep during the course of naturally acquired and experimentally induced, 178
Turkey:
pathogenesis of ischaemic pectoral myopathy in the domestic, 286
poults, salt poisoning in, 55

UNDER-NUTRITION, energy and protein, in the weanling filly foal, 331

VETERINARY education, conference proceedings, 383
Vitamin E-treated lambs, improved recovery of, that have been experimentally infected with intratracheal chlamydia, 291
